

# Nothing's the Same

**Black Label Society**

Lost again and all alone  
Lost again for I should have known  
So many scars, so many times I've died  
Another good-bye

Crash and burn  
Refused to learn  
Your only friend inside the scars that never mend  
This trips inside the dark  
The never ending rain  
Kill the past  
Nothing's the same  
Nothing's the same

All the faces I once knew now are gone  
Days turn into years rolling on  
So many storms  
So many times I have died  
Another good-bye
