

Make That Scene

Black Oak Arkansas

I've been to new york city and la too
I've loved many a girl
But none quite like you
You've got that something
I've been looking for
You know what it is girl
Just give me more

You've got that something baby
You know what I mean
I can dig it if you could
We can make that scene

You know you move me
Git to my soul
You give me fever
For rock 'n' roll
You've got the rhythm
You move just right
Take me with you baby

Make me feel all right

You've got that something baby
You know what I mean
I can do it if you could
We can make that scene

You know theres certain things
Makes a man feel alive
A woman who will love him
And stay by his side
Feed him in the morning
Love him every night
Take him in her loving arms
Make him feel just right

You've got that something baby
You know what I mean
I can dig it if you could
We can make that scene
