To Make Us What We Are

Black Oak Arkansas

Work all day, party all night tryin our best just to make things right the stars are turnin and the world is burnin this fire's just a justice flight

Bring you to our hearts throw you to the sky all you do is wonder why we'll try to reveal that magic seal but always remember that we are real

The thickness of water
the wind of air
a pinch of fire and the potions there
to make our miracles
to make your happy smiles
to make light year miles
to make us what we are

To make you aware magic is there or do you care what we can share believe in spirits yes believe your near it we're on earth to learn what love is worth

Feel the power a saint can feel then remember that you are real let's be together let's be as one we'll shine as bright as any sun

The thickness of water
the wind of air
a pinch of fire and the potions there
to make our miracles
to make your happy smiles
to make light year miles
to make us what we are
