

Punky Blonde

Black River

you are, youve been and you will always be the one
my dream, my desire the sense of my life
be mine, be now when i see you i get higher
one smile one glance- and you light the fire

its my life, its my fate my love and pain
my redemption and hope
no one can only you the one in the universe
to make me feel im alive
go my way
make me feel

i know and everybody
knows you are not for me
you have only my dream hellish unreal

quick quick quick love me
or never let me feel it
my heart like dum-dum
love and hate in fire

its my life its my fate my love and pain
my redemption and hope
no one can only you the one in the universe
to make me feel im alive but i know...
im all right im all right im all right im all right but i feel
it x4
love and hate
