The Key

Black Stone Cherry

Out here there's a hole in the sky Doors open to the other side I saw a two headed dog fighting over a bone Black haired woman turned into crows

I gotta take a step back and think this through I gotta know it's true

I gotta know that I'm living in a dream Is this what it seems? Gotta know anyone believes How did I get lost? What's the final cost? Could you please help me find the key?

Out here under the willow tree Down deep is where you'll find the key I've been here once before Maybe in a dream thylacines play tambourine

I gotta take a step back and think this through I gotta know it's true

I gotta know that I'm living in a dream Is this what it seems? Gotta know anyone believes How did I get lost? What's the final cost? Could you please help me find the key?

Out here the saying goes off with the lights And on with the show Once it's dark the children play They all join hands and dance around the grave

I gotta know that I'm living in a dream Is this what it seems? Gotta know anyone believes How did I get lost? What's the final cost? Could you please help me find the key, find the key?
