

Fire It Up

Black Water Rising

Yeah you're blazing like the rays of the sun
Once again you're wasted and the days just begun
And you don't quite know why or care
You only want your share of that stone cold misery
When you're looking for a refill you come and see me

(Chorus)

Fire it up
I want to see it all ablaze
When you fire it up
You can count on me to guarantee
That mutha gonna burn for days

Yeah this devils got your heaven for cheap
Don't pretend you have a soul for the good lord to keep
And you don't quite know why or care
You only want your share of that stone cold misery
When you're looking for a refill you come and see me

(Chorus)
