

All we need is the money

Black

I make no promises
I make no guarantees
It makes no difference
When you're all at sea

Try me for money
You can try me for days
I'll be indifferent
When you've none you can't pay

Say something good to me
Say it's not always
You've got the power
Now give us the means
We can do it, we can do it
All we need is the money

You made your preference
You made your guarantee
And it made no difference
We're still all at sea

Tell me it's working now
You can tell me for day
I'll be indifferent
There's no justice this way

Say something good to me
Say it's not always
You've got the power
Now give us the means
We can do it, we can do it
All we need is the money
You've got the power
Now give us the means
