

# Lotus Flower

Blackalicious

Be alive now  
Let me open the door  
Let the music captivate and make the voices still  
And  
See the light  
See the lotus flower  
Spinnin' around within  
Openin' up all new worlds to explore  
Ay Ay Ay Ay

Here we go ridin' on waves  
See the lotus  
Creepin' up without a notice  
Make a foe spaz  
Dwellin' in a zone that's so rare  
Really no man  
Be up in or try to go there  
Outta your head  
Flyin' through the sky on mopeds  
Yellin' oh yeah  
Cosmic universal showcase  
I'm a go head  
Shoot the gift at y'all  
With no lead  
Get you open  
Runnin' around the rings of Saturn  
And some Pro Keds  
Screamin'

Ain't nothin' wrong with you  
Do not adjust your channel  
Keep movin' on won't you  
We've just began to travel

Stylin' infinite and passion  
Make me mash on  
Till the last song is done  
So fasten  
Your belt and let's run  
To intersessions  
You're probably stressin'  
I didn't come to rhyme about  
Using a Smith and Wesson  
We test understanding  
Lessons  
That come from down and under  
Where sons haven't been born  
At my discretion  
I'm here to bless ya  
Apply the pressure  
To get ya  
Aligned with mind and body  
Party  
Syncing  
With the bigger picture  
You may not get it now  
But in the future

You will mature  
And join the Craft  
And outer sessions  
If the music lets ya  
It's just the essence  
Of pure common sense  
It's not a lecture  
If you don't make it in this life  
I'll see your spirit  
Next time  
Screamin'

Just let the song take you  
To places where the magic  
Is going on people  
I know you've got to have it
