

## Wish U The Best

Blackbear

Yeah, unh  
Just used my last 1% to text you that shit wasn't worth it  
LAX to JFK, I probably miss on purpose  
Funny how when I don't care these feelings all resurface  
2016 was catastrophic, I deserved it  
Just thankful that it's over  
Just grateful that it's through  
She got a runny nose  
I don't think that it's the flu  
I got a table at the Nice Guy  
Got a bottle of this Ace  
You and your girls drank all my liquor and you ain't even say thanks  
Hoe

I would wish you the best  
But you already had it  
You already had it, baby  
I wish you the best but you already  
Unh, you already had it, babe

(Ohh, ohh)  
Unh, lately I been feeling so dead in my own skin and it's a problem,  
I admit it  
When I look into the mirror, that ain't me, that's someone different  
Reminiscing, had a vision  
Getting married, having kids  
And let's be honest only thing I'm raising is these fucking digits so  
And all these rumors that you bitches start are probably true, I did  
it  
Feeding lines of blow to models off a mirror in the kitchen  
It's ironic and specific  
Can't say they never saw themselves  
Starting a problems with addiction

I would wish you the best  
But you already had it  
You already had it, baby  
I wish you the best but you already  
Unh, you already had it, babe
