

## Always Have, Always Will

BlackHawk

I used to think that love was just for dreamers  
That fate and destiny played no part  
But finding you has made me a believer  
That we were meant to be right from the start

Before the sun and moon stars  
We put there in the sky  
Before the mountains stood tall  
Above this world so high

I loved you then, I love you now  
And I'll love you until  
Always have, always will

Before the light broke through the dark  
You were the candle in my heart  
Before the dawn of time  
I was yours and you were mine

Before the sun and moon stars  
We put there in the sky  
Before the mountains stood tall  
Above this world so high

I loved you then, I love you now  
And I'll love you until  
Always have, always will  
Always have, always will
