

# Let 'em Whirl

BlackHawk

Whirlwind running through my head  
Wasted words that people said  
The wind is howling at my door  
I don't listen anymore

The darkened sky blocks out the sun  
Still reeling from the damage done  
If I go out and chase that wind  
I might not make it back again

Let 'em whirl, who are we to say  
You gotta do things different  
I know a better way  
Let 'em whirl, there's a child in everyone  
Who's got to ride the storm out  
To see who'll they'll become  
Let 'em whirl

The simple things are hard to see  
I got you and you've got me  
No cause left for us to fight  
Being wrong's a God given right

Let 'em whirl, who are we to say  
You gotta do things different  
I know a better way  
Let 'em whirl, there's a child in everyone  
Who's got to ride the storm out  
To see who'll they'll become  
Let 'em whirl

We all learn the hard way  
We can't pretend to know  
Where life is gonna lead us  
Or which way the wind will blow  
Let 'em whirl

Let 'em whirl, who are we to say  
You gotta do things different  
I know a better way  
Let 'em whirl, there's a child in everyone  
Who's got to ride the storm out  
To see who'll they'll become  
Let 'em whirl
