## Locked Within the Crystal Ball

**Blackmore's Night** 

Here in the spotlight this moment is ours No one can stop us, we're one with the stars

I feel the waves begin to rise Far across the ocean deep within your eyes Silently watching as they fall I can see the future locked within the crystal ball

Strike up the lightening, hear my prayer Feel the light electric dancing through the air Here by the ancient castle wall Can you see the future locked within the crystal ball

Here in the spotlight this moment is ours No one can stop us, we're one with the stars

Quiet by nature, standing tall Old stone circles, they have seen it all Caught like a ghost in yesterday, shadows down the hall Are locked within the crystal ball

Fire and water, earth and sky Mysteries surround us, legends never die They live for the moment, lost in time, I can hear them call They're locked within the crystal ball

I feel the waves begin to rise Far across the ocean deep within your eyes Silently watching as they fall I can see the future locked within the crystal ball
