I knew the moment that you walked in You were looking for your old friend Well here I am
It ain't no big surprise
You got a broken heart to kill
Tired of knowing how it feels
When you learn you been living
A lie

Oh, and ain't that a shame You shouldn't feel such pain

But you can't blame no one but you, Delilah For what you find when you never ever look around Reach out for the one right here beside ya And find the one that's never gonna let you down

Mmm, mmm, mmm

So go ahead and take your shot
Drink your whiskey on the rocks
And tell me how
You'll never find the one
But Lord knows it hurts me bad
Every time I see you sad
Knowing that my love
Goes on and on

Oh, it just ain't right You're alone tonight

But you can't blame no one but you, Delilah For what you find when you never ever look around Reach out for the one right here beside ya And find the one that's never gonna let you down

Mmm, mmm, mmm

You can't blame no one but you, Delilah For what you find when you never ever look around Reach out for the one right here beside ya And find the one that's never gonna let you down

Mmm, mmm, mmm

I knew the moment that you walked in You were looking for your old friend Well, here I am It ain't no big surprise
