

# Underneath the Same Moon

Blake Shelton

Shadows of the night  
Moving on the ground  
Like silent clouds  
They follow me around  
As I wander the dark  
Through the midnight mist  
Remembering our last kiss  
Do you know how much  
You're missed

[Chorus:]

Tonight I stand in this lonely place  
I search the heavens  
For some saving grace  
And I cry, dying without you  
I know you're somewhere  
Looking up there too  
Right now that's all  
Two distant hearts can do  
Oh-ooh, at least were underneath  
Underneath the same moon

Picturing your face  
Flowers in your hair  
Like you always wear  
Oh I can see you there  
Longing to be touched  
But you're out of reach  
Oh hold on please  
Won't you wait for me

[Repeat Chorus]

la la la  
la la la  
la la la  
Oh-ooh At least were underneath  
Underneath the same moon

Shadows of the night  
Moving all around  
Moving on the ground  
They follow me around
