

We Don't Need You

Blanks 77

Angry faces out in the crowd
no one with the guts to shout it out
doin' what you're told, little follower!
fuck the scene, you can't be bothered

[Chorus:]

we don't need you, go away
we don't need you, go away
we don't need you, get away from me
scared to break away from your little pack
scared to death they won't take you back
gonna work it out straight away
gotta work it out before it's too late

[Chorus]

it only we could work together
then things would be so much better
but you don't know what you're doing here
so just get down, grab another beer

[Chorus]
