

Black Electric

Blak Audio

I watch the streets glow before me
And hear them promise a story
If only I'll listen
Oh, I
Watch the skyscrapers as they melt away
In the drops I can hear them say

This is the instant; let the gravity lose it's grasp

[Chorus]
We are rising
Up from this underground and
We are blinding with black electric
As we set this night alight

I heard they say the boy's missing
Heard they say he's been kissing
The sparkles of the night
Oh, I
Heard they say that he turned the other way
Heard he's planning along with strays

Who in an instant; let this decadence take its grasp

[chorus]

I heard the streetlights sigh
I set them all to sleep again
I deny that it's goodbye
We'll dance another night

I heard the streetlights sigh
I set them all to sleep again
I deny that it's goodbye
We'll dance another night

Who in an instant; let this decadence take it's grasp

[chorus]
