

# With Your Arms Around You

**Black Audio**

I see grace, raining gold  
It descends as you fold  
Under the pressure, under the beauty  
Of it all  
You were crushed just like me  
Still you sway, gracefully  
Cutting right through me, I feel your beauty  
As I see you endlessly longing for

Someone from somewhere  
To show you how to care  
When no one will join you  
You must dance alone, we must dance a

You see gold in our past  
You see we can't outlast  
Pervasive dilution of our perfection  
Still you stand  
With the gold raining down  
You glide back, and I've found  
Those moments of beauty, I feel you're with me  
As I see you endlessly longing for

Someone from somewhere  
To show you how to care  
When no one will join you  
You must dance alone, we must dance a

Feel the beauty of it all  
See the beauty  
Feel the beauty of it all  
You'll find beauty when

Someone from somewhere  
To show you how to care  
When no one will join you  
You must dance alone, we must dance a

Someone from somewhere  
To show you how to care  
When no one will join you  
You must dance alone, you must dance a

Someone from somewhere  
To show you how to care  
When no one will join you  
You must dance alone, you must dance alone

Someone from somewhere  
Can show you how to care  
When no one will join you  
We must dance alone
