Patience

Bleach

Patience only comes when you spend your time just waitin' You're the only one, that's worth to wait, I think you're great And writing melodies Somehow seems to ease, all the junk that's built up inside

Patience is what comes when you're waitin' all alone Listenin' for the phone hopin' that you get a call Maybe from some friends Wonderin' how I've been, wonderin' if we all could hang out

And bring back the good times I think that that would be just fine Bring back the good times

Patience won't you come 'cause oh I feel like life's suspended I have not become the thing that I have so intended Put my mind at ease and I'll write melodies And I'll sing songs of hope that's to come

Bring back the good times I think that that would be just fine Bring back the good times

I won't embrace the things that I have done 'Cause patience waits for what we will become And oh, it's so much more I know that it's so worth waitin' for
