Wake Me

Right from the start I knew You'd set a fire in me And I'd rather be sad with you Than anywhere away from you And hey I can't believe I captured your heart Oh whoa oh I can't believe I captured your heart Stake my life on it If somebody's gonna quit Then I'd rather be sad with you Than with any other girls but you And hey I can't believe I captured your heart Oh whoa oh I can't believe I captured your heart If you're lonely lonely lonely wake me I can't believe I captured your heart Right from the start I knew You'd set a fire in me And I'd rather be sad with you Than anywhere away from you And hey I can't believe I captured your heart Oh whoa oh I can't believe I captured your heart
