

Last Of Our Kind

Bleed from Within

It's time to make a sacrifice
I walk the earth with visions of the end
Civilisation grows out of hand
As streets become crammed by day to day life

If you take the time to read between the lines
There's more to this story than meets the eye
The signs are all around you
You just have to open your fucking eyes

Can you see right through me
I feel like i am never there, like a fucking ghost
Do you feel betrayed
Do you feel like a shadow in the bigger picture

We are overcrowded by our disgrace
Indignity, our fellow man will be the death of us
There isn't a light at the end of this tunnel
We have reached the end of the road

And angels voice wont be there to save you
Betrayal will be your last words
