

## Borrellia Mass

Bleed The Sky

Taking the first step  
Has left you all dried up  
The demon has slipped  
And forced you under the gun  
I can't see the future.  
No one can stop this  
Nature's test is second-best  
Give a chance to sorrow  
Never faulting never feeling  
It's already become this way  
Never seeming that you're feeling  
It's already become this fake  
Into the grave. You're my demotivation  
Take me to the place where I should fall  
That's where you want to see it all  
Send me home you know I need it all  
That's where you watch it all  
Never faulting never feeling  
It's already become this way  
Never seeming that you're feeling  
It's already become this fake  
Take my life, I hand it over  
You will use it for your gain  
Never seeming that you're feeling  
It's already become this fake  
You Fuck (What a failure)  
To us all, to us all you've failed  
Your vice, your lies, your temptation is gone  
It's your time to fall. You're my demotivation  
Take me to the place where I should fall  
That's where you want to see it all  
Send me home you know I need it all  
That's where you watch it all  
First in line to taste the wine before the finish  
Gets demotivation  
Last in line to beat the blind, enjoy the finish  
Gets demotivation  
Down.
