

## Melt Down

## Blessed Death

Rays of death beyond our sight  
Escape their metal walls  
For life we are forbidden  
Painful death will have us all  
Nuclear reactor  
With its human in control  
Push the poison slowly  
Keep the earth from hot back hoe

Bolts of red hot lightning  
Fill the sky in broad daylight  
Earth is slowly melting  
Tell not if it's day or night  
Millions of degrees  
Turn solid rock to molten steel  
Glowing red hot rivers  
Turn human lives to earth's last meal  
Many billions years  
But to the sun not time at all  
Inside the sun we'll find ourselves  
When man's reign hath to fall

Planet earth lies barren  
No life no light  
Reactors stand like guardians  
For bones in nuclear tombs  
Play with fire and you get burned  
Predestined hand of doom
