Eye of the Storm

I think I've stayed for the last time, goodbye Hope is so much closer to beauty than sorrow I think I'll leave and leave self pity to die Reflection is always brighter than shadow

Please come closer Cause I don't even touch you anymore Please see I'm walking in to the eye of the storm And I'll still come out loving you even more

Love is in the air tonight So just breathe

You made sure the atmosphere was thick tonight So this is where it begins and where it ends With a crack in a dark sky piercing light

Please come closer Cause my heart doesn't touch yours anymore Please see I'm walking into the eye of the storm And I'll still come out loving you even more

Love is in the air tonight so just breathe Breathe my spirit breathe Love is in the air tonight so just breathe Breathe my spirit breathe

leave, leave now and don't look back
leave, leave now and don't you look back

Please come closer Cause I don't even touch you anymore

Please see I'm walking in to the eye of the storm And I'll still come out loving you even more

Please come closer Cause my heart doesn't touch yours anymore

Please see I'm walking in to the eye of the storm And I'll still come out loving you even more

Blindside
