

Coma

Blindspott

Your light just went out
And in the darkness
A voice rings out
Telling you how this hurts
So bad its time to give back
Everything you thought you had

Your life's mine now
Watch you die now
Your not for the passion
Your just for the look

Inside your so black now
Unhealthy fixations
Rot you from the inside out
You should have thought!
You should have known
That I would be the first one
To let you know

Your life's mine now
Watch you die now
Your not for the passion
Your just for the look

Watch them as they fall around you
Were you pushed
Or did you fall?
Did they tell you this would

Last forever

I've heard you before

Hold on

Let go

Give in

Or die slow

Its time to let you know

Your life's mine now

Watch you die now

Your not for the passion

Your just for the look

Watch them as they fall around you

Were you pushed

Or did you fall?

Did they tell you this would

Last forever

I've heard you before

Its over

Its over

Watch them as they fall around you

Were you pushed

Or did you fall?

Did they tell you this would

Last forever

I've heard you before
