Can we get real for a moment? You're my one and only friend

Watch the sunset from your sedan Let your hand rest on mine

I've lived in every town
But here is where I find home

My mind is open
And my body is yours
Show me the sign
Please

I was so sure, I was faulty And not able to love But then you crept up on me While I was dreaming Whispered love into my ear

I've lived in every town
But here is where I find home

My mind is open And my body is yours Show me the sign

If you're tired I can drive us
We can go back
To my place

My mind is open
And my body is yours
Show me the sign
Please
