

## R.I.P.

## Blood Feast

With the destruction of the land  
Death will be close at hand  
A mishap long, long ago  
Who taught us to fight, no one knows  
Terrorism a thing of the past  
The power in the wrong hands kills at last  
Survivors are few and scattered  
Their remains are torn and tattered

Get your guns, get your weapons  
We're going out, for the killing  
Don't get in our way we'll stomp you  
If you live we take no prisoners

Sick... Disgust... Eternal... Rest  
They come from all sides  
Better make sure you put out your best  
Sick... Disgust... Eternal... Rest  
AAARRGGGHHH

The ultimate sacrifice has come to us  
Worse than exploding a school bus  
The time to regroup and strengthen  
To the earth's end will make us legends  
Kill all mutated and birth defected children  
Leaving no sight for anyone to catch them  
The endless winter is cold and harsh  
Remembering when you thought it was a force

Sick... Disgust... Eternal... Rest  
AAARRGGGHHH

The world as we know never regains  
It all changes in time, not quite the same  
The marauders reap, havoc in time  
But they run around the world more or less  
In all the confusion no one knows blind  
The evil one plans for everything to blow  
One last bomb was left for some strange  
It goes off now there will be reason  
No more seasons

Get your guns, get your weapons  
We're going out, for the killing  
Don't get in our way we'll stomp you  
If you live we take no prisoners

Sick... Disgust... Eternal... Rest  
They come from all sides  
Better make sure you put out your best  
Sick... Disgust... Eternal... Rest  
AAARRGGGHHH
