

# Evil In The Brain

## Blood for Blood

Go! Now I'm older and my mind is set  
I'm moving like a guided missile haven't reached my target yet  
I'm loaded with anger and adrenaline get so mad  
and raged sometimes I forget where I've been  
My thoughts are cluttered I'm confused  
That causes a shortening of my already burning fuse  
Been cheated on a chance to lead a normal life  
Everything I've ever done has always ended in strife  
In the night, the night always brings the pain  
I feel so dirty, my hands, my hands are stained  
Can't see eye to eye with anyone, my mind is set and done  
You can't argue with a loaded gun  
Sometimes, sometimes I feel I'm going insane  
with all these sick thoughts in my head I'm going evil in the brain  
I lack any type of common sense 'cause I always want to solve  
all my problems with my fists and violence  
I think I'm going insane  
I want to give fear to the world  
Evil in the brain  
you can't reason with a lunatic  
I'm evil, evil in the brain  
Evil in the brain are the only words I can use to describe  
what I saw, how I grew and what I didn't want to know  
I see the world die and not last long enough to see the blood dry  
I'll die! Smirking and laughing as long as I get my goals in sight  
That's right, it's end is what I wish for every night  
And the world is going to hell in a hand basket  
all I want to do is fill it's casket  
I'm losing the cancerous tumor in my head I call a brain  
I'm losing control  
evil in the brain  
Kindness or hatred, I can't tell the difference  
evil in the brain  
I wanna give fear to the world  
evil in the brain  
You can't reason with a lunatic  
I'm evil, evil in the brain  
Sick ideas seem so normal inside my brewing hate  
but in everyday life I'm totally abnormal  
And all I see is red I was misled  
I wish I was dead instead of having being bled  
And now it's me against the world  
Right or wrong,  
I haven't changed this long because my madness is that strong  
But in the end the world will pay  
I won't be held responsible there's never been another way  
I'm losing the cancerous tumor in my head I call a brain  
I've lost it  
I'm going evil, evil in the brain  
No pity for the suffering of the world 'cause my mind is fucked  
and my heart is cold  
Look at my face, there's no grace  
and I'm laced with disgust for the entire human race  
My mind is a fury traumatized by all their shit and lies  
Broken promises and endless hatred for the world, it dies!  
A recipe for madness in a sick cold world  
I can't go on with these cards I've been dealt

I'll just fold  
Evil in the brain  
evil in the brain
