

Love Song

Blood for Blood

Tonight this one's for us.

Hey brother!

I see what they done to you.

Hey brother!

Can you see what they done to me to?

No where to turn and we got nothing to lose,

But you can count on me if I can count on you. It's true!

Hey brother all we've got's each other

In a world of shit, y'know they made us suffer.

Hey brother all they let us have is each other

So let's fuck society up...

They'll never see the side of life I've seen

They'll never understand what made this hatred inside me breathe.

I found my family on the city streets

Because they locked me out of their American dream. They lie!

And through those years of redemption denied

I couldn't see the truth through the blood in my eyes. They lie!

I know they want to tear us up my friend,

But we can spit in their face until the bitter end, my friend!

Hey brother! I see what they done to you!

For you I will fight!

Hey brother! You can see what they've done to me too!

For you I'll do it right!

Hey brother! We got nothing to lose, it's true!

For you I'll defy!

Hey brother! So tonight this one's for you!

For you I'll fucking die...

Hey brother, all we got's each other

And they been treatin' us rough.

Hey brother, all they let us have's each other

So tonight this one's for us.

Hey brother, all we got's each other

Through these years so rough.

Hey brother, all they let us have's each other

So let's fuck society up.

They won't break my heart again.

They will never take my heart again. never again

They won't break my heart again. never again

They will never tear us up again, my friend.

Tonight this one's for us...
