

Embrace Me

Blood Stain Child

I don't know how to touch you in the voiceless, senseless, blind world

The whole place is black and white landscape

I live the same world as you do in the eternal time

I wish for the end of time I wish for the end...

I'll sing for you...

Love me... Save me... Hold me... I don't leave leave your side

Lead me... Bring me... Take me... Close to your heart

The same sky, earth, air, I feel them as

Still, I'm apt to be controlled by loneliness I try to break a wall

There isn't what we must not break It is created thing all what we can see

Love me... Save me... Hold me... I don't leave leave your side

Lead me... Bring me... Take me... Close to your heart

Love me... Save me... Hold me... I don't leave leave your side

Lead me... Bring me... Take me... Close to your heart

I wish for the end of time Fallen love...
