Embrace Me

Blood Stain Child

I don't know how to touch you in the voicless, sensless, blind world The whole place is black and white landscape I live the same world as you do in the eternal time I wish for the end of time I wish for the end... I'll sing for you... Love me... Save me... Hold me... I don't leave leave your side Lead me... Bring me... Take me... Close to your heart The same sky, earth, air, I feel them as Still, I'm apt to be controlled by loneliness I try to break a wall There isn't what we must not break It is created thing all what we can see Love me... Save me... Hold me... I don't leave leave your side Lead me... Bring me... Take me... Close to your heart Love me... Save me... Hold me... I don't leave leave your side Lead me... Bring me... Take me... Close to your heart I wish for the end of time Fallen love...
