I'm evil no, I'm evil no I reach for the sky The moment of truth has just begun A twist of light a burning sun We settle the score The day of the reckoning is over My soul is black forever burned We can't forgive the unforgiven Unholy signs of fallen souls I dance with the beast In the darkness I'm evil Your blood is a feast In the fading light tonight I'm evil no, I'm evil oh, I'm evil no I'm riding the wind The still of the night I left behind The break of dawn a new frontier Awaken the fall A crack in the sky an open doorway The race is on I'll show you why We can't forgive the unforgiven Unholy signs of fallen souls I dance with the beast In the darkness I'm evil Your blood is a feast In the fading light tonight I'm evil no, I'm evil oh, I'm evil no I'm evil, I'm evil no
