The Leaving Song

Bloodsimple

Sit here all in all Waiting on the phone Push my body to the floor Still you never call She's still with me Kiss still kills me Can't feel guilty It's just a memory

All the things you put me through All the hopeless nights I tried to make it right for you Show me how it is to lose And who the hell are you to drag me down with you

Flowers that I bought are now dead and gone Love that was before is gone evermore All my hurting, all my yearning, all that burning Can't you see that it is me My beautiful...

All the things you put me through All the hopeless nights I tried to make it right for you Show me how it is to lose And who the hell are you to drag me down with you

Every time I looked in your eyes Crucified again Every time you sold me your lies I was justified in the end Just like some face lost on a runaway train Pass me by and wave goodbye

All the things you put me through All the hopeless nights I tried to make it right for you Show me how it is to lose And who the hell are you to drag me down with you
