

## What If I Lost It

Bloodsimple

When the time is right you got to get up and fight  
When your number's up you gotta get up and die

Would you walk five blocks to meet me  
That skin will get numb

How many times have you been mistreated  
How many times have you been mislead  
They brought this nightmare to life  
All we wanted was to be respected  
Learned our lessons, and don't you ever forget  
We stand larger than life  
What if I lost it

It was said and done but I needed some more,  
I hadn't had enough, kept kicking in doors

Would you walk five blocks to meet me  
That skin will get numb

How many times have you been mistreated  
How many times have you been mislead  
They brought this nightmare to life  
All we wanted was to be respected  
Learned our lessons, and don't you ever forget  
We stand larger than life  
What if I lost it

Convicted with no excuse  
Just pull the trigger, I got nothin' to lose  
Disputed I will not be locked down  
Split lipped with nothin' to lose  
I never really change my point of view  
Dispute it, the victim is you...  
I will not be locked down

How many times have you been defeated  
How many times have you been depressed  
How many times have you taken the beating  
How many times have you been put to the test  
All we wanted was to be respected  
Learned our lessons, and don't you ever forget  
We stand larger than life  
What if I lost it

Would you walk five blocks to meet me  
That skin will get numb
