

# Attack From Planet Transilvania

## Bloodsucking Zombies from Outer Space

So now we're here our ship has landed  
We crawled out of a dirty hole  
To conermenate the living is the plan  
And our endavor to destroy  
We sprear some frightness  
We scare you to death  
Our thoughts are hot, bloody and gazed  
We really love to wreck'  
We are the hangmans axe, that falls against your neck  
Trampled to death underneath our feet  
Come on dance to this stomping beat  
Get pulverized by this galatic heat  
Attack Attack from Planet Transilvania  
Beware Beware - a satanic force, that's what we are  
We don't take any prisoners, your flesh is what we need  
We came from outer space, we are the zombies  
Let evil blow you a kiss  
And give the world this sign: 666  
Life and Death is just a laugh  
In this miserable farytale we're all cought  
If you forget the difference between above and below  
There is no separation between your life and our fucking horros  
how  
Trampled to death underneath our feet  
Come on dance to this stomping beat  
Get pulverized by this galatic heat  
Attack Attack from Planet Transilvania  
Beware Beware - a satanic force, that's what we are  
We don't take any prisoners, your flesh is what we need  
We came from outer space, we are the zombies
