Frankenstein Created Woman

Bloodsucking Zombies from Outer Space

Laboratory, reanimation
A human corpse on an operation table
Radioactivity – electricity a new technology
Pure insanity
The baron ´s working hard tonight
Fire ´s burning in his eyes
Igor disconcerted asks him shy
"is graverobbing not still a crime?"

 Frankenstein created woman
A new creation of mankind
He sewed dome bodyparts togther
But he took a damaged mind

Frankenstein created woman
A perfect girl is hard to find
Frankenstein oh Frankenstein
Completly insane in his/her mind

Connect the wires and turn the switch on
Blue light illuminates the dark old room
The beautiful body begins to fidget
When a current impact encounters it
The creature wakes up of its sleep
Noone gets far from her hands that
flames clink crawl up and bind
destroying everything eager to find
