

Space Invaders

Bloodsucking Zombies from Outer Space

Let evil out, let madness swing
Our psychotic minds with lust to kill
We are no slaves or masters - of none
We are the worst case scenario and we have come
The world belongs to the undead
So they keep coming back
In blood thirsty lust for human flesh

Pits the dead against the living
From outer space right down to earth
We kill and murder and give
Rock'n roll a bloody birth
So join the Space Invaders
When you've got nothing left to loose
Join the Space Invaders
You are welcome in our brood
The Reception test so simple, have no fear to try
To join the Space Invaders you've got to die

We are the extraterrestical scumbags
The delected butchers of pain
The evil chromosome running through our vain
And in the mouth of madness we will drive you insane
So join us now, take this ride with us
You will stay so young and pretty when you die fast
Cause when you're dead we will bring you back to life again

Slit up bellies, tear out entrails
Smash the bones and shred the brains
A gigantic mess of wastes and gones
