

## Fear no evil

**Bloody Hammers**

There's no escaping the apprehension  
In the meantime you can try  
To accept the ones who follow  
Make a common sacrifice

On the seasonal Sabbath day  
You parted with the worries you couldn't hide  
Every telling star to follow  
Destiny set aside

Fear no evil  
Fear no evil

Circle the flames in vespers  
Higher and higher they go  
Forever to the ritual  
Spirits here bestowed

Fear no evil  
Fear no evil

Follow the path to find  
The deadly life you want  
Your final breath has been exhaled  
But eternally you haunt

Recognizing constantly  
Exactly what you are  
Fear no evil  
As you fly into the stars
