

Black tattered eyes, she's dressed in white
Cold afternoons left in my mind
We walked, I talked it through with you
It's just no use our love won't bind

Don't be fooled by the lipstick gaze
Veils of cool shelter time
She strained the days, I made it through
I'm running out of the dark with you
With you, I'm running out of the dark

For the thousandth time, the fountain flows
Watch skies align, then leave me numb
You call I've fallen like the fool
You know I am, I never knew

I'm fooled by her lipstick gaze
Veils of cool shelter time
She strained the days, I made it through

I'm running out of the dark with you
With you, I'm running out of the dark
With you, with you

Light storms in evening rain
Watch it fall apart
Watch it fall apart

I'm running out of the dark with you
With you, I'm running out of the dark
With you
