

# Make It Up

Blow

I thought I knew what love was but  
Turns out I'd never seen this stuff  
I though I knew what love was  
But it couldn't ever shown us  
In the heart of love  
You might just have to make it  
We can

Make it make it up make it  
Make it make it up make it  
Make it make it up make it  
Make it up

I thought I knew what love was  
Turns out I might have faked it more than most  
I though I knew what love was  
But here in your arms I never have to bluff  
You might just have to make it

Make it make it up make it  
Make it make it up make it  
Make it make it up make it  
Make it up

They say that atoms never die  
They just exchange  
And what you see that makes up me  
Will one day take some other shape  
And by this method we become  
To be something we don't approve of  
But right now what we are is  
Just right  
We get to make it up

Make it make make it up  
Make it make make it up  
Make it make make it up  
Make it up  
We get to make it up  
Make it make make it up  
Make it make make it up  
Make it make make it up  
Make it up

I know rules of love were made for us to break them  
To break them  
When you see a chance to get what you deserve  
You take it  
I know rules of love were made for us to break them  
To break them  
When you see a chance to get what you deserve  
You take it  
I know rules of love were made for us to break them  
To break them  
When you see a chance to get what you deserve  
You take it  
I know rules of love were made for us to break them

To break them  
When you see a chance to get what you deserve  
You take it
