

Debris

Blue October

A fresh start
Let me walk around your ball park
A fever we can learn from
Now just breathe it in
It's ok
To want
To have
To take
So embrace the one
You can't replace

She's the only woman

Soft spot
Shaking from the knees up
Got me screaming sneak a peak
Into my life dear
Now just breathe it in

In my sea
She's the water
When my ship is going down
She's my north wind
When I go south
She knows how far I'll go.

It's ok
To want
To have
To take
Embrace the one
you can't replace

Embrace the one
Who held your fate
Embrace the one
You can't replace

She's the only woman
