

Drop

Blue October

I touch the tongue to see
A devil's face in front of me
A sad man in front of me
You blow your nose then cry
And the clown demands a sad good-bye
A sad man and sad good-bye.

Black below the tree
White horses dead in front of me
A sad man in front of me
A scar below the cheek
Where there's a sweaty man with a bloody sink
A sad man and bloody sink

It's just a trip not a way to ease your pain
(This is not a way to ease your pain)
Self help, tell another shrink the same damn thing
(Listen for the way to ease your pain)
Stay cool, everything is going to be OK
(I think it's rather time to ease your pain)
Until you decide to drop again
Until you decide to drop again

A blue jean girl to be
And still the sweaty man is behind the trees
Behind the trees
The flip side of sanity is the game
I'm fourteen million miles away
I'm fourteen million miles away
Away from sane
A dark man in the restroom window pane
Whose words just pour out human pain

It's just a trip not a way to ease your pain
(This is not a way to ease your pain)
Self help, tell another shrink the same damn thing
(Listen for the way to ease your pain)
Stay cool, everything is going to be OK
(I think it's rather time to ease your pain)
Until you decide to drop again
Until you decide to drop

Now I'm so high, so high, so high
So I, so I decide

'Till you decide to drop again
A carnival ride, you'll trip again
Until you decide
Until you decide
Until you decide
(2x)

It's just a trip not a way to ease your pain
Self help, tell another shrink the same damn thing
Until you decide to drop again
