Cynthia

Blue Rodeo

So you saw that fire in the sky Well I think that's so cool And I know that nothing will change you You are nobody's fool

Won't you take me to Pyramid Lake with you We could watch the spaceships Maybe they'd take us on a trip Into that never ending sky Into that wide and endless night

And you stood in their beam of light And they showed you the bones on the moon Well I hope I get to go there With you real soon

Won't you take me to Pyramid Lake with you We could watch the spaceships Maybe they'd take us on a trip Into that never ending sky Into that wide and endless night

We could get there Before the sun sets And we'd put up your tent Watch the stars Dance all night And watch that sun come up

Won't you take me to Pyramid Lake with you We could watch the spaceships Maybe they'd take us on a trip Into that never ending sky Into that wide and endless night
