

If I Will Rule The World

Blue System

Baby, I swear you
Baby, I would die
I would run to you

We're leavin' New York to the rain
East of the summer, see you again
I love you baby
Where's deep emotion

Oh, where the mountain meet the sky
West of the moon, I could not hide
Love you lady
Where's deep devotion

I love you every night, I love you every day
This is a deep love odyssey

If I will rule the world, I promise you the best of me
If I will rule the world, you ever get the best for free
For every heart, every soul
Pray in my bed, I'm losing control

If I will rule the world, I promise you the best of me
If I will rule the world, you ever get the best for free
For every heart, every soul
Pray in my bed, I'm losing control

I'm leavin' you in S.O.S.
Turn of your dream and confess
Love me baby
See my emotion

Or is it somethin' that I should know
Closer to heaven, we will go
Be my lady
Wear sweet devotion

I love you every night, I love you every day
This is a deep love odyssey

If I will rule the world, I promise you the best of me
If I will rule the world, you ever get the best for free
For every heart, every soul
Pray in my bed, I'm losing control

If I will rule the world, I promise you the best of me
If I will rule the world, you ever get the best for free
For every heart, every soul
Pray in my bed, I'm losing control
