

# Last Night I Dreamed

Blues Traveler

It's the part of the dream that leaves me when the sunlight hits my eyes  
It's the part of the dream that rolls me over and over as I sleep  
It's the part of the dream that leaves me wanting for the darkness  
It's the part of the dream I can't remember it at all

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed  
Last night last night

Something about a big jet plane moving fast off into the sunset  
Maybe a mustang moving fast up to the sky  
Mor like a great big boat drifting off to nowhere  
I know that in the end you were waiting on the other side

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed  
Last night last night

I can feel the dream long before it makes my mind  
I know the dream like the scent of the evening air  
I need the dream to keep me safe until the morning  
When I open my eyes you're there

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed

I dreamed about you last night  
I dreamed about you last night  
I dreamed about you last night  
Last night I dreamed
