## **Blues Traveler**

Met my woman on a mountain side Looking to get warm, needed a place to hide She took me in as that day grew long Lay by the fire our love, love grew so strong

I had left the city for its dirt and grime
The factory wails to make mountain time
I found love, I let it slip away
Now I'm alone, here I'm gonna stay
Gonna stay
Gonna stay
Yeah, I'm gonna stay

I keep on looking till this very day

For my baby, my baby, who's gone away

And I'll search this land, search this land till my dying day

For the sweet loving woman, make a mountain, make a mountain cr

y, cry

Make a mountain cry

Mountain make a mountain cry
