

# Dreamland

Blutengel

In the darkness of the night  
The fear crawls into your soul  
Your heart beats faster than before

You are staring at the wall  
And you pray that he won't come again to touch you

Follow me, my little angel  
I'll lead you to your dreamland  
Where everything feels different  
Where you can be yourself

Take my hand and spread your wings  
I'll lead you to your dreamland  
Where you will feel no pain  
And we will care for you

He destroys your youth  
Every night he pretends to love you  
And you wish that you were someone else

There is so much pain  
Paralyzing all your thoughts  
And you just want to fly away
