Ice Angel

Blutengel

I close my eyes Wish to sleep At night my dear, you look so sweet Ice Angel, why are you so cold?

Ice Angel, it doesn't matter what you said to me I feel the coldness of your I see the frozen light inside your face

One day, my love, it breaks my heart And I will not return, Not return to you, my love Not return to all this pain, Not return to all your love And after all I know, Only my heart will live on

If someone cries for you, It doesn't matter what you do (It doesn't matter what I do) If someone cries for you, And every lie comes back to you (Every lie comes back to me) It's a parting with this moment, Kiss your eyes with crystal lips (Kiss my eyes with crystal lips) I see the darkness inside your heart, There's no place for me to be (There's no place for you to be)
