

Did you know that you were leaving when you first told me your name  
Convince me that you love me while planning your escape  
Always looking past me on to someone else's face  
Tell me  
Is he all the things you tried to change me into

Tell me does he make you high?  
Does he make you real?  
Does he make you cry?  
Does he know the way you feel?  
Love is all around you  
Your universe is full  
But in my world  
There is only you  
Yeah, there is only you

Kept me at a distance while you told me you want more  
Plans about our future made with one foot out the door  
You say that it's over but there's some things I can't ignore  
Tell me  
Is he all the things you tried to change me into

Tell me does he make you high?  
Does he make you real?  
Does he make you cry?  
Does he know the way you feel?  
Love is all around you  
Your universe is full  
But in my world

I have my fears, you let them out  
Now I wrap myself around you like a blanket full of doubt  
The darkness burns, the sunlight stings  
Cause he's holding everything

Does he make you high?  
Does he make you real?  
Does he make you cry?  
Does he know the way you feel?  
Love is all around you  
Your universe is full  
But in my world

You made me high  
You made me real  
You made me cry  
Now you know the way I feel  
Love is all around you  
Your universe is full  
But in my world  
There is only you.
