

## Every Heart: Minna no Kimochi

Boa

Tell me babe, how many do I shed my tears?  
Every heart  
Every heart is not a gentle yet  
Shall I do?  
I can never say my loneliness  
Every heart doesn't know so what to say oh what to do  
Was afraid of darkness cause I felt that I was left alone  
So I prayed for help to distant million stars  
Round and round the planets revolve round the sun  
And we always seek after love and peace forever more  
Growing growing woe baby we can work it out  
Look up at the sky every heart is shining all today  
Show me now  
What kind of smile do I come across  
Every heart every heart can take a step towards the dreams  
All of us what to take a lasting happiness  
Whenever you feel sad, I wanna hold you  
And give you a sound sleep  
Someday every hearts gonna free and easy  
We have peace of mind  
Someday all the people find the way to love  
Goes and goes the time goes on we are not alone  
We live on together and we will find some precious things  
Sometime we will smile sometime we will cry somehow  
Don't forget believing yourself - tomorrow's never die  
There is the warm heart places on my mind  
In my earliest day's there and it's so sweet  
There are many stars they have talk with me so kind  
They say yes always time's friend of mine-so shine  
Round and round the planets revolve round the sun  
And we always seek after love and peace forever more  
Growing growing woe baby we can work it out  
Look at the sky every heart is shining all today  
Goes and goes the time goes on we are not alone  
We live on together and we will find some precious things  
Sometime we will smile sometime we will cry somehow  
Don't forget believing yourself - tomorrow's never die
