

You Are My Star

Bob Catley

My search isn't over
There are more places to go
I will look to the mountains
And the valley's below
I'll follow the stars
They'll show me the way
And the time will come
When I will find out where you stay

You cannot hide from me
Is it so hard to see
I will always find you
And I won't let you run away
It's better if you stay
Where you are
You won't get far
'Cause you are my star

I can feel it's not far now
I travel by night
I will continue my walk
Until I can reach your life
I know you are close now
I know you are lost
When will you understand
That it's me that you can trust

You cannot hide from me
Is it so hard to see
I will always find you
And I won't let you run away
It's better if you stay
Where you are
You won't get far
'Cause you are my star

I will give you shelter
I will protect you now
I will save you from this dark
I will listen to you
I will keep you warm
Yes, I will save you from this harm

You cannot hide from me
Is it so hard to see
I will always find you
And I won't let you run away
It's better if you stay
Where you are
You won't get far
'Cause you are my star

You cannot hide from me
Is it so hard to see
I will always find you
And I won't let you run away
It's better if you stay

Where you are
You won't get far
'Cause you are my star
